DECODE NbS:
A DECISION NUDGING TOOL

A web-based decision nudging tool for Indian cities to embrace Nature-based Solutions (NbS) for climate resilience. DeCode NbS offers a collection of NbS as an alternative to conventional city infrastructure to address specific climate challenges. It empowers urban decision-makers with tailored, function-based solutions to catalyse urban climate adaptation and mitigation.

CORE ASPECTS:

- Facilitate strategic adoption of NbS in cities
- Guide prioritisation of NbS based on local challenges
- Integrate NbS into existing urban planning frameworks
- Support cross-sectoral decision-making
